Grand H(umanity) tackles the conflict between migration policies («the system») and humanity by giving the floor to 15 human rights activists, committed citizens & Luxembourgish Minister of Foreign Affairs Jean Asselborn. Grand H challenges the biased asylum narrative by examining and raising awareness on the dehumanization inherent to European asylum policies and governance.

15 vérité-testimonials about social courage, activism, the magic of human bonds
edited like a surreal dialogue for a polyphonic documentary.

**“Migration is one of the key challenges of the 21st century. It is a question
which threatens to break up the European Union.**

A question for 510 million Europeans.

A question that concerns all facets of our lives: the economy, politics, culture.

And finally a moral question that all of us need to answer individually.”
